Mr. Bud Fensterwald 2112-C Gallows Road Vienna, Va. 22180 Dear Bud,

Jin told me of your very kind offer to drive me to hopkins and we both appreciate it very much. Hopefully, Lil's sister will be able to do that. She is a fine driver. But, she hit a deer taking me there last Tuesday. Not her fault - itran in front of her on 170 and inflicted much damage. If her car is in the shop, which is waiting the delivery of body part, she'll have a rental car and if It isn't is safe to drive when it is not dark. I'm to be there by 9:30, Sunday, the 10th and we can leave after dark and make it. They operate the next day.

How long I'll be there is a variable. The cardiologist told me about two weeks.

I think I'm in the best possible hands. I was a henatology patient when I was there for the eye surg ery and was much impressed by the henatologist. So, when I needed a replacement when Dr. Hufnagel died he got me their chief of tardiovascular and transplants surgery. When I needed a cardiologist he arranged for the doctor he said is best for the opinion needed and without my asking him we said he'd arrange for the best for the particular surgery - now need. I'm lucky.

First time this hematologist walked into my room he said, "I've been reading about you." I asked him what and he said there was this man who wrote that all \(^{\pi}\) believed about the Warren report is its page numbers. (A crib from Kurtz by a stuffed-shirt historian.) \(^{\pi}\) told him \(^{\pi}\) could argue a bit about them, too, and he laughed.

after + could use my better eye again I had some fun by correspondence with that historian jerk. he even insisted that whitewash was published the year after it was and still was it satisfied when I sent him a copy of the copyright page!

Again, our thanks and our hopes for a good holiday season for you an yours - and us!

Sincerely,
