

2/5/79 - a few comments by FIA 'tom No.

689,690 are on F rd-Deloa contacts. There are others having to do with a party meeting. On still another 'cover' referred to Fred as a "lead." I'd love that one. The papers would not use and pretended not to recall citation.

719, the "Louisiana situation" - can it be the Secret Service printing investigation? You may recall the FBI got the SS out of that fast. However, after LBJ gave the FBI the job there are records referring to SS as having jurisdiction.

745 - there is so little reference to the JFK assassination remaining I suspect the FBI excised some of that material, too.

757 - That Eldon Badd was an SA in NYC Legal, now Congressman. It was a Navy place, he had pix and tape of intercept, was met at 1000 filed a little after midnight by Hollman (Soliman?) WFO "red" subject expert.

760 - supposedly custody of LHO's military records makes no reference to any security clearances.

62-109140-1489
769 - background on Ferris et al, suits that Ferris was case defense investi-
gator when Marseille boat deportation rap and was at the court with SA Regis Kamm Gy.

839 - I presume you know Marie Kelly-Karver connection/CIA.

900 - of the records relating to us, perhaps these, the FBI knew before release that it had fabricated and released despite invocation of Privacy Act and JL's letter to AG. Since Act I was entitled to have correction disclosed with any corrected records. But they were not about to admit that the so-called annual celebration of the Russian Revolution (two months early yet) was a fabrication and they could not resist the temptation to defend. It was a Jewish Welfare Board picnic after the high holidays, for West area service personnel and families. I suggest this represents the real Gostape/KGB, aka FBI.

918 - my copy not complete. Any hunch who the source is? Space does not fit name of Dallas 'neo-derald' editor who took up with FBI about them. Note that this was not leaked until after Shanklin's retirement was secure and that Hestry was not in any way disciplined for the destruction. Even allowed to talk to HSCA and Earl Galt.

942 - me on the Glen Burke Show, FBI's refusal to participate Noble has always been in Lane's pocket. When the FBI would not provide opposition Noble turned to Lane and his publisher, who provided four lawyers, in apparent anticipation of ruining me and helping the Lane coding market. It worked the other way. I ruined them and it made quite a show.

950 - the finding of the bagged pistol in downtown Dallas I got this in C.A. 76-0322. No follow-up investigation, at least not in files I got.
