

1/17/67

I have had another letter from Dave Lifton that is consistent only with the serving of Liebeler's interest. It is written as though for future quotation. I have not answered it and I will not - unless he or Liebeler is foolish enough to try and use it publicly. It is difficult for me to conceive of his new initiation of an attack on one of us, again when the other side is in trouble, as pretended scholarship. Unless one considers the fairies and needles bit "scholarship". Also consistent with his manufacture is one of his uses, one he at first disguised and then, unintentionally, revealed. He sent it to the New York Times, so they could use it against me or in weighing future decisions against me.

If you have heard of the "New Island Movement" or Glen Hagen, I would like to hear what you know. If you haven't, I have some information on it and him and expect to develop more. He and it may not be involved, yet they also may be.

Richard A. Rye is in Washington. We are having problems with him and his problems. He talks as though he wants to go to Germany and intends to if he can. Linda told my wife she doesn't want to. I will explain this to those of you to whom it makes no sense when I am out there in two-three weeks.
