Dear Maggie.

5.5%

We are in the midst of moving. So many years of no physical exercise take their tall and I'm winded, so I stop for this note and to return this copy of the Lettens picture I no longer need. I should have done it a long time ago but I had forgetten about it until blundered into it. any thanks for it. Incidently, I am expecting to see the large prints made by the SEPost and those big as the top of a desk' that the FBI had. If they show anything also, I'll let you know. First, however, I am going to spend what little time I can be there going over the files I'm now in. Tomorrow I'm taking some pictures of 399, other than CBS showed or LIFE took. If my intent can be captured on paper, I will have pictures that will show how the bullet is flattened at the rear end with no scratches, etc., and that there is not even at the wrong and possibility of the accountable fragments being missing. If you want prints, please let me know.

I will not go into all thet I have just added in a postsrcipt to POST MOPTEM, but even after what I've published, it is, to me, shocking. It also is a pretty fat indication that the Aennedy family is not really responsible for the initial superession of the pictures and X-rays. It is unquestionable proof that they did not keep the commission from seeing them or using them as evidence. I want no publicity on this until the book is out, but I thought it desireable to let you and bill know, for whotever it might meen in your own thinking.

I also have what to me is sufficient proof that Specter knew what he was doing. If he didn t knew it when he did it -and I'm convinced he did -it will not long before the enormity of it struck him and, Liebeler-like, he started laying a backfire of self-justification. I will have copies of these with me when I'm out there.

There is a chance that when I pack for that trip, after all the added confusion of this hasty and already once-aborted move, with all the accumulations of two lifetimes to sort out, I may forget some things. Of those things I have mentioned beving that you'd like to see, if and when you can, please drop me a raminded I cal use as a check list. I must have more than 2,000 pages by new, Some of it is well scattered. I've forgotten some, and I may not think of some items.

Paul Hock has the two INCA records, it you are interested in their content.

o word from Parellax, so I do not know when I'll have copies of the New rleans book to send, but as soon as I have them, I'll mail a package cut. I hope your silence is a measure of how busy you are getting your book out!

Sincerely.

Hos
