

FINGERPRINT FIND <sup>F Post</sup>  
9-24-77  
HARWELL, England (AP) —  
Atomic scientists at a Berkshire research station may have made a breakthrough in the fight against crime. They found radioactive material which shows up fingerprints on clothing.  
After the substance is applied to an article of clothing, it is X-rayed and the photographic print outlines the fingerprint clearly. A spokesman for Scotland Yard's Forensic Branch says the new process "would be extremely valuable to the police, especially where cases of sexual or other assaults are involved."
