In a recent invitational flyer for our PICNIC on the Grassy Knoll on November 22, we provided a listing of people invited to come for all concerned to see. The flyer was only sent to the select list mentioned, not to any broad or general mailing list. Unfortunately, our design left some of you with the impression that all those named were hosting the event, which was not our intention.

We apologize for any confusion created, and we hope you can attend the event. We continue to extend our invitation in the spirit of truth.

Yours,

John Judge

If this is not in response to my protest then someone else beat me to it.

In this apology they still fail to state who did agree to be hosts. If any.

"Research" for these dedicated and sincere people is mostly theories and conjectures of a nature than make almost anyone a conspirator.
