

4/16/83

Dear Mr. Grzela,

Thanks for taking the time to write me and for enclosing the clipping.

I'm now 70, in impaired health, and can't begin to keep up with the litigation I've filed or the writing I want to do, so I just can't make any new investigatory efforts.

You assume I have a staff. I'm alone.

As for lawyers, I'm not able to pay the one who handles my FOIA cases and he does that without fee, something he can't afford to do and he can't take any new cases on.

I'm sorry, but thanks.

Sincerely,

Harold Weisberg

Mr. Harold Weisberg
Federick,

Portland, Oregon
April 10, 1983

Dear Sir:

After reading about your outcome in the enclosed copy of the San Francisco Chronicle, it motivated me to write you and get you up to date on some of the other missing interesting items that are still being "omitted-news" today, by the U.S. Government and the current Senator Edward Moore Kennedy of Massachusetts. Both are "coverups" in the matter.

In my cross country search of an American lawyer to "expose" Senator Edward Moore Kennedy of Massachusetts, has made me just a little tired of the system of justice in America with its "public-servants" such as Senator Edward Moore Kennedy of Massachusetts.

You can be assured, that this matter has been referred to the American Bar Association, showing the executive officer that the system is not working in America.

It should interest you to know that the famed Cape Cod Kennedys had the services of this "genius" without any strings attached, and what you must remember is that I was born in the city of New Bedford, Massachusetts., on the 20th of July 1916.

One day, I found myself in New York city, volunteering into New York's National Guard, just beating out the induction period, on November 13, 1940. During the time of taking tests and examinations, the "analyst" who was in charge of the entrance examinations, told me that I was a "genius", and I told him to stay off of my back about that, for I knew it back in my Jr. High school days back in New Bedford, Massachusetts.

Well the USArmy stayed off of my back about it, but after the "hostilities" I re-enlisted into the USAF and thats where all of my troubles began. They, the USAF had other plans about me and wanted me under their "surveillance program" and research developement. I couldn't get them off of my back, while in the USAF, that I decided to do a "million-dollars" worth of aircraft damages, and do the trick. Finally, time came for a retirement from the USAF, and retired on November 30, 1960.

Now that I was in civilian life, I thought I was free from their surveillance program, but low and behold, I found that I was again continual under the surveillance of the local Internal Affairs Bureau of the city Portland Police Department, here in the city of Portland, Oregon, and they too thought it was very funny, until the day former President John F. Kennedy was assassinated, which like the death of Senator Robert F. Kennedy and informing Senator Edward Moore Kennedy of Massachusetts makes for the funniest story of the year, -any year.

(continued)

Senator Edward Moore Kennedy of Massachusetts had the impact and knowledge on the matter before him, and so with the weight of the government he decided I was a charlatan. So he was only interested in serving his own self-centered interests and the course of our nation's history was changed, at a tragic cost.

So the real trouble maker and instigator, Colonel P. A. Hurst of then 20th District OSI/USAF, then stationed at McChord AFB, Tacoma, Washington got away with the "Presidential Assassination", after passing all of my personal records information to the city of Portland I.A. B., Portland, Oregon.

In short, the local Portland's I.A.B., buried President John F. Kennedy under the sidewalks of the city of Portland, Oregon. And after my personally writing Senator Edward Moore Kennedy of Massachusetts made the death of former Senator Robert F. Kennedy for the funniest story of the year, -any year.

In the obvious "scandal of the century", I suggest you make it your business to get in touch with the very best of your colleagues who are attorneys and make yourself at least a dozen copies of the letter enclosed. I'm inclined to think that any three-judge panel would turn over in their graves after reading this about the "omitted-news" of the President John F. Kennedy assassination, with "no-thanks" from the current Senator Edward Moore Kennedy of Massachusetts, who like many people gave this matter only lip-service and manipulated it in every way possible.

Remember, this currently does involve the CIA,USAF/OSI, the Internal Affairs Bureau of the city of Portland, Oregon, plus the NSA and FBI included, so be aware of its implications. It does add to the "JFK Murder Data".

To digress a moment and invite you and your staff to visit and soak in the local environment where they grow and teach one to become "genius". Be my guest and soak it all in the four seasons. I'm sure a "Kennedy" will never invite you ever. In addition, his "delaying--tactics were terrific,"with history, unfinished.

In closing, should you be interested in making quite a bit of history again, then feel free to contact me anytime.

P.S. Remember, I retired on
30 Nov. 1960 here in the city
Ptld, Oregon.

Sincerely,

Mr. Julian Grzela

He'd Had Enough

Court Denies Author JFK Murder Data

Washington

The U.S. Court of Appeals upheld yesterday a lower court ruling that the FBI is not obliged to furnish author Harold Weisberg with additional information on the assassination of President John Kennedy.

"This court has bent over backwards to ensure that Weisberg have a reasonable opportunity to develop his case against the FBI," the appeals court said.

"We have sorted through the mass of Weisberg's contentions, in many instances with more care than he has demonstrated in making them," it continued. "At long last, we are convinced that the government has carried its burden. . . . We therefore bring this long and difficult litigation to a close."

Weisberg, author of six books on the Kennedy assassination, filed suit in 1970 under the Freedom of Information Act. The court of appeals noted that it had already considered various aspects of Weisberg's suit three times.

"We find that the government has finally proven the adequacy of its search for all documents Weisberg has requested," the three-judge panel said in a 38-page opinion.

Weisberg contended that the FBI destroyed or withheld evidence that would show Lee Harvey Oswald did not act alone in shooting Kennedy on Nov. 22, 1963, in Dallas.

The court said there was an indication of FBI foot-dragging before Congress strengthened the Freedom of Information Act in 1974. But since then "the FBI has in many instances been unquestionably generous in its effort to assist Weisberg's investigation," the court said.
