

Dear Dick,

6/6/92

In haste, so I can mail this when we soon leave for our usual Saturday night fine Oriental supper with warmth and friendship.

Up also only a little after midnight yesterday and today I've gotten a fair amount on paper, more than a chapter and rough as hell but on paper. Yesterday it went rapidly until I looked for a newspaper story I have and in several hours of searching could not find. This morning I was tired and took a short nap.

Not counting how rough it is I have much of another chapter on paper. I have copies of the documents for it made and I think that especially after the stuff they've been publishing C & G will find the documentation and what it says and means impressive. And it is relevant.

I don't really need the clipping but I want to be absolutely overwhelming and expect to be. It is one of the very many proofs I have of JAMA's lie in saying the pathologists broke a 26-year silence in speaking to it. I won't take the edge off it by telling you any details but the no-goodnick Boswell, who like Humes looks like everyone's grandfather, was interviewed as early as 1966 and as recently as for High Treason 2. They have both been on coast-to-coast TV and radio and of the four Dallas doctors interviewed also for the very first time in 29 years JAMA says. I interviewed two in 1972 and report what they said in Most Mortal.

This is the chapter, with much more than what I say above, that idrafted and is unread and uncorrected. I also had correspondence with both Humes and Boswell and the correspondence refers to still another interview Boswell gave in 1966.

At least I do not have to go to Johns Hopkins next week unless it is Saturday night!

Then on the following Saturday night to see if I can be leaked successfully. They think if they can I'll be less tired.

I do not have the transcript of the press conference so if C & G can get one from their contacts that would be helpful. I do not pretend it is necessary and in truth it really isn't but I want this to be really definitive, no stone unturned, the FBI cliché, and I may pick more lies up from it. Not that JAMA has not already spanned the gap between annals and Munichhausen, with all I need and more.

If at any time you want me to stop writing and read and correct so I can send it let me know. But I want to get more on paper and there may be less confabulation when the stuff has cooled more.

Hope everything is going as well as it can.

*Heald*
