

9/2/67

Dear Jim,

The statement attributed to Irvin Dymond by AP, that "He have learned of a witness whose testimony will show that it would have been impossible for shots to have been fired from the grassy knoll area", is fascinating. Does he intend to defend the entire Warren Report? What an historic rebuttal you can then have! I am presently working on some of the most exciting material on this that the Commission did have. I will soon have it ready for publication.

However, to prepare for Mr. Dymond specifically and on this point, I would appreciate any pictures you have available that show the bottom of the picket fence. One of my readers has sent me some pictures showing exciting and to date, to the best of my knowledge, undisclosed possibilities. I also have the Dallas city plans that would be essential to any Operation Jeen Valjean, the sewer systems before and after the rebuilding of Dealey Plaza.

James Harris has described your introduction. The idea is so entirely appropriate! I hope you have been able to finish it so that nothing will further delay the appearance of the book.

I was in Boston and spent until early yesterday morning with Bob Scott. He has not been able to locate Arthur Strout. From his own experience with his New Orleans fellow radio-TV journalists, Townley is not the only one of his kind.

Sincerely,
