Dear Larry,

Whenever I am off on a trip it is followed by such confusion and the need for cleaning up a large accumulation of mail that arrived during my absence. As I near the bottom of that stack I begin to take care of the things I said I would do when I was away.

Enclosed is the unpublished FBI report on Gaudet, the one making no reference to you or his strange attracting of attention to you the same day as this one and made by the same agent. That one was published in the Warren Commission's 26 volumes. I can't recall the page offhand. However, Tom Bethell undoubtedly has a copy of it. He did speak to you about it and when I wanted to speak to you also, he got a bit mad, so I didn't for several years.

If Tom doesn't supply a copy of the published one, let me know and I'll take time to dig it out and make a copy for you.

For some years Gaudet published what would seem to be a profitless "Latin American reports" from a suite of offices in the Trade Mart (both old and new). In some cities where it had offices, the CIA had fronts with offices in the same buildings.

Interesting?

and he attracts attention to you?

Best regards,
