

12/30/70

Dear Bud,

In the course of filing something relating to John George (Wyatt), I just noticed my picture of him is missing.

I believe I loaned this to you for you to copy the day you gave me the Vallee picture.

I now have more on Vallee I'll be bringing in for you to copy if you haven't gotten it. Whether or not you have, please do not make any redistribution of it at least until after we discuss it for I already have two different explanations of how and why it was released, fear it may be a trap to be used against us in suits, and fear even more the irresponsible use that can be made of it. Paul, for example, has expressed great fears of what would happen if it reached Skolnick, and some of your people persist in the strange notion that Skolnick is the one for whom the halo was invented.

If you cannot now find this picture, we should seek to replace it. Not only do I need it, but I think you do. I got it from Louis Ivon.

Hastily,
