

5/16/95

Dear Gerry,

My dear friend Dal McGuirk, 93 Pah Road, Auckland 1003, New Zealand, has not been able to get the disk of Case Open printed. ^{B/} Because you were able to I hope that you can give him the beginning information because they have a different system dyon there. I hope that when his people know how it all begins they may be able to figure it out and print it for him. And I believe two different machines or systems were used by the very fine woman who was using a computer for the first time.

I think you said Dennis is more hep on those things so maybe he will have an idea or ideas.

Dal just gave a speech to the history teachers' annual convention, It went well. He also is working on a book for high-school students down there on the JFK assassination.

He is fairly well prepared with stuff from Dave, Jerry and me.

I think it is a great idea and if it goes might have some sales here.

Hope you (pl) can figure out something that can help Dal to get that to work on their systems.

Thanks and best,
