

Dear Harold,

April 15, 1998

Let me reassure you that Bill and I will be happy to help in any way we can, including gardening. Given the recent attention on King, I am interested in looking into that more, and helping you locate materials you may need I am sure will also be a learning experience for me.

I showed that special on the King case you appeared on near the 25th anniversary and it seemed to strike a chord among several students in my race and ethnic relations class. My colleague who helps me teach that course, a black woman who is director of community relations for the city, also is very interested.

Whatever freetime I can get over the next week I will devote to looking over my JFK materials, so I can come prepared to do some further research and avoid duplicating things I have obtained on previous trips. Jerry McKnight has sent me a copy of the notes he took on documents focusing on the FBI's relation to the Warren Commission. I have written Jerry and told him of ~~our~~ upcoming trip. Unfortunately, I am sure he will probably be very busy with school matters. Wood is a lot like Wofford in many ways.

Regarding to the two disks you sent recently, one of the secretaries here has printed them both out. The Groden manuscript looks ok. It runs 223 pages and seems to be in order just skimming through it. I may try to read it before I come up.

Take care, and I look forward to the visit. Regards to Lillian.

Best,
