Recognized Nationally

Founded in 1893 as a liberal arts college for women, Hood College has been in the forefront of American higher education for nearly 100 years.

Today the College retains its liberal arts tradition and at the same time provides students with career preparation. The mission of the College was, and is, to prepare students for successful lives both in the workplace and the community.

Hood is recognized nationally for academic excellence. Ranked one of the best small comprehensive colleges in the nation by U.S. News & World Report since 1983, Hood was the only women's college in the top 10 in the magazine's latest issue. Earlier, the news magazine had

named Hood the number one small comprehensive college in the East. The *Everywoman's Guide to Colleges and Universities* has named Hood third in the nation for the quality of education it offers women.

Outstanding Faculty

The Hood faculty, women and men selected for their credentials as teachers and as scholars, work closely with students to shape their academic programs. The emphasis on individual attention and excellence in teaching is a distinctive strength of the College.

Hood's undergraduates may combine any of 29 majors with dozens of minors, and are strongly encouraged to take advantage of off-campus internships and other opportunities to gain practical experience. In the graduate program, students may select from among 13 areas of study, or may develop an individualized master's degree program.

Diverse Students

While Hood is a small college, it serves a diverse group of students. The College has a substantial number of continuing education students (aged 23 and older) working to complete their undergraduate degrees, and attracts many Hispanic, Black and international students. Most undergraduates choose to live on-campus.

Excellent Facilities and Resources

Hood College is located on a 50-acre campus in historic Frederick, Maryland, an hour's drive from Washington, D.C., and Baltimore. Visitors are impressed by the beautiful Georgian style brick buildings and tree-shaded lawns. The 34 campus buildings house

well-equipped science laboratories, music and art studios, modern computer facilities and a computer classroom, a library containing more than 300,000 books and resource materials, and a child development laboratory. The Mura Resource Management Center is nationally recognized as a model for energy management. Groundbreaking for a new library/information technology center is planned for the fall of 1990. The indoor and outdoor pools, tennis

courts, and a mile-long Parcourse exercise track circling the campus are used by students and the community.

Undergraduate Curriculum

Approximately 1,100 undergraduate students from across the nation and more than a dozen foreign countries attend the

College. The student-faculty ratio is 12:1 and the average class size is 15 students. The College has 78 full-time faculty, 76 percent of whom hold the doctorate or highest degree possible in their field of study.

All students take a core of courses that exposes them to modes of inquiry in different disciplines and helps them develop a strong sense of historical perspective in both Western and non-Western Civilizations. Hood offers 29 undergraduate majors in the humanities, social sciences, and sciences, as well as in such career-oriented areas as communication arts, social work, computer science, law and society, and management. Each year more than 400 students earn academic credit while acquiring practical skills in "hands on" internships that enhance classroom learning and employment options.

Graduate Program

Hood College graduate programs

are designed to meet the needs of students who wish to upgrade their skills or pursue new career options. The College offers the MFA as well as Master of Arts or Master of Science degrees in 13 areas of study.

Graduate students are employed in such fields as education, biotechnology, management, and computer science. The graduate program faculty includes both full-time faculty and adjunct professors who are specialists in their field. While most courses are taught at Hood, the College serves students at off-campus classrooms in Montgomery and Washington Counties.

Conference Groups

Throughout the year Hood welcomes conference groups, providing on-campus housing to small groups during the academic year and to large and small groups during the summer months. The facilities are well-suited for meetings, conferences, workshops, and seminars.

Hood's convenient location near the metropolitan areas of Baltimore and Washington, D.C., also offers conference-goers the chance to visit these cities, each about an hour's drive from the campus, and return to Hood for meetings and recreation.

Best of Two Worlds

Hood's location offers the best of two worlds, the beauty of the county and the resources and excitement of the city.

Frederick City's celebrated historic district, a few blocks from Hood, offers charming shops, antique stores, and dozens of restaurants and night spots.

Frederick County, with a population of more than 120,000, is rich in history, tradition and natural beauty. The Appalachian Trail, the picturesque C&O Canal, Camp David, the Secon Shrine, and state and national parks are within a half hour's drive. Historic Hagers Ferry, West Virginia, and the Civil War battlefields of Gettysburg, Pennsylvania, and Antietam, Maryland, are also nearby.

The cultural resources of Baltimore and Washington, D.C., include national monuments, museums, art galleries, theaters, and concert halls.
