

6/1/77

Dear Jim,

These are the Hule records I mentioned yesterday.

Pretty wretched business.

I expect there will be more.

We probably both suspected that the sheriff was making his own copies before he took the Ray records to Canale's office for them to copy.

Sometimes I'm a little tired or perhaps my mind can wander when I go over these. While I believe your perusal is not the best way to spend your time I also think you do spend some this way. If you do I suggest you be sensitive to indications that copies provided to the FBI came from the Sheriff's office rather than or not only from Canale's.

The reason I say indications is that they will never state it. Like with bugs and taps, they never say that. Or the results of black bag jobs.

You can decide whether this would now mean something as a matter of law. I believe it happened and that there will be indications of it.

It is now far down the line but on this also be alert to indications that Foreman was under electronic surveillance.

I am establishing a file on this general subject.
