Deer Paul.

Here ere the documents I've gathered.

I never kept a file on munt because I never believe any of them were in any way involved. That I had was incidental to other interests. I do not recall what I sent you in the pest, but I know it included these:

0087:454, CD 1472, CD 1267, CD 1542.

I knew Gary bad tuings I didn't, so after I met you I asked him to send you wah he had. I never asked him for either a list or copies, so I do not know what he sent.

I have a microfilm of what is said to be the entire Texas-investigetion file, from the "ibrary of "ongress. it isn't. But I spotted two things in it, the 12/21/63 Hell-Clements interview with July (which I may not have located in the Archives-I do not remember), R-64 in the police file; and R82, a report by Jack Pevill that I copied anyway, even though I sesumed you have it. on the chance you do not.

Also, CD103 or 105:368

T CD106:231 (CD &CR identical)

CD1267 (prob. duplicate) (5pp)

▽ CD1306:103-5

T CD87:454 (in case I didn't send or this is better copy)(3pp)

CD1322c (2pp)

- CR7:481-2

I foiled to get CD7:701, "withheld ... at the request of the Jederal Bureau of "nvestigation". Farhaps you can get it. Matter of fact, tas archives at first acknowledged the existence of but five of the above, and I am pretty sure this includes a number that are marked as withheld.

Because I do not know how you left, although I knew you planned to, if you think copies of these documents should be with funt and you'd prefer not to send them, let me know. I'l, be gled to. Ind if there is snything further you'd like from or done at the Archives, let me know and I'll tackle it. Can't promise I'll succeed because they do not like me there. But, I sometimes find what they cannot and others do not.

Then you move to LA, let me know how to reach you. Someday somebody mey have me out there to make a speech and parhaps we can get together again.

Curry's book was not a disappointment to me because I look at it differently. I have often wondered it I had anything to do with it because, although he appears unflappable, I think I blew his mind a year ago November. In his appearances he has said what is important only because of his position: there is no proof Gsweld was in that window. This is an enormous understatement, but coming from Gurry it is significant. As I believe I told you, I hope that someday those Texas people who can afford it will help bring the truth out; not only in the national interest but in that of their State...I wondered more about this watching E. Ross Perot on TV yesterday (despite his oft-repeated

declaration of hat he seeks for the country i did not write him esking help).

I know you feel more free. If you decide to go shead with your literary project and want me to do anything, ask it.

If you ever come accross snything you think would interest me, I hope you'll send it.

Good luck. I hope your new position is congenial.

-incerely,
