7/2/97

Dear Mr. Izzard,

We do appreciate your letter of the 23rd and the interest it represents.

We also wish it were possible for us.

We are both past 80, both with serious physical limitations, and among the nine listed ailments for which I was rushed to The Johns Hopkins Hospital in Baltimore from the local hospital are congestive heart failure and renal failure. So, there is not much I can do that requires any physical effort.

We are not able to reprint any of the books. We can keep two available only as xerox editions a friend has made for us. So, we really have no spare supply. If book stores order them we supply what they order but that is about all we can do. Alas!

All my books and among other things all my literary rights and work will become the property of local Hood College. I have no agreement with it on reprinting but it will have that right. I doubt it will happen absent some very unusual development.

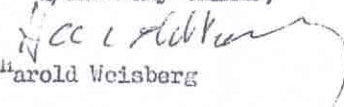

I have many completed manuscripts that have not been published because that is and for some years has been physically impossible for us. But they do exist and will be available to scholars at the college library.

People do want to know and government wants them not to know.

I suppose the answer with regard to the tobacco industry is the vast economic problem total elimination of it means for agriculture and for the manufacturers.

I have a real problem in recommending sources of other information. This is because most of the people writing in the filed have theories in which they have faith but which are proven to be impossible by the existing official evidence that does stack and of which they are ignorant. It takes a really great amount of work to dig that stuff out and few people have or will take the time.

Again many thanks,

  
Harold Weisberg

Dear Harold/Lillian,

Thankyou for autographing and sending the books I ordered so quickly.  
I am still reading "Selections From Whitewash" great reading.

The cost of shipment came to \$54.88. ( refer to attached receipt).

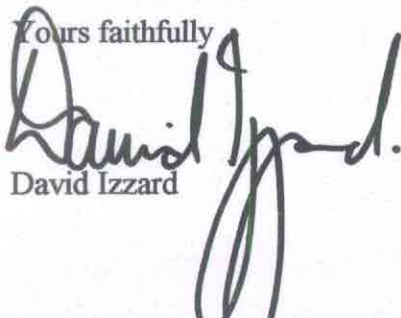

Have you heard from the "Modern Book Co" ? I can send you details of  
Australian book store chains that might be interested in Harold's work.

I was at dinner over the weekend and again someone was talking about the  
JFK case. People in Australia relate so much to America and its recent  
history. I am always being asked my opinion about the case and what  
books I have read. I know very little but still people want to know about  
this event in history. Its my pleasure to recommend your work to those  
who are bothered to read and learn.

I've been reading about the Tobacco Industry in America finally being  
forced to admit responsibility for there product. Why does it take so much  
effort for the truth to be admitted? The efforts of the Tobacco Industry to  
deny blame would be nothing to the struggle that yourself, Gary Mack,  
Cyril Wecht and others have been through with the JFK case. I urge you to  
keep up the fight.

Would you be kind enough to recommend where I can gain more  
information on the case.

Yours faithfully

  
David Izzard
