Dear Paul,

If checking Los Angeles area phone numbers is no great trouble for you, or if Jim is still around and can do it, I'd appreciate knowing if any of these is a good one and if s, in whose name, what address:

841-7444

841-3477

447-4984 (last digit poss 0. Note closeness to Chicago number)

The first number appears as 8-413-477. Can you think of anything else it could represent?.

These are Sirhan numbers. Kaiser ignored them, which means that the FBI and police did or withheld from defense. They are repeated in what Diamond called ( and I am persuaded is ) Sirhan's automatic writing when he was in an hypnotic state.

I've finished the Kaiser book. I'm astounded at the remarkable parallels, more than I had realized. He was entirely unaware of them. Wish I had time to note them all. I'm impressed by the book. I regret he appears to have had no contact with anyone really knowing anything about the other assassinations. John Christian is the only one mentioned. Aside from knowing your opinion, he knows nothing, really.

I think he was in the right forrest, but was looking for the wrong kind of tree. And so many look alike to the untrained eye.

Bernard Diamond comes through as an imaginative guy, but not quite daring enough, or not politically sophisticated. Kaiser refers to the Copenhagen case of which I'd known, the one that is the basis of The Billiken Courier. Wish Diamond had read that!

Someone is saving the WerBel story for me. If I cannot get another, I'll send that to you. Besides Dick, of whose interest I am certain, others may want copies, like Jim. Maybe Hal.

Best,

ROY ERICKSON COMPANY
