

An about-face in our classrooms?

A decade ago, Neil Postman co-authored the phenomenal bestseller, *Teaching as a Subversive Activity*, described then as "a no-holds-barred assault on outdated teaching methods." The title of his new book might indicate he's reversed his position. Not really. What he does is point out just where educators have gone too far with some of his "revolutionary" theories—and where he went too far as well. Parents and teachers throughout the United States are ready to re-examine the sweeping changes made in classrooms during the past ten years; Neil Postman's new book promises to be a controversial, widely-read bestseller.

People live forever

in a wonderful, brand-new kingdom within an earth that is itself very new. But it gets to be too much of a good thing. So a young prince names Emir is sent on a quest for answers, and in a surprise-filled odyssey meets Conscience and Inspiration and invents the idea of Death. Jane Roberts' many fans—her *Seth* books have a dedicated, growing following—will find a psychic connection in *Emir's Education* as well as a source of practical inspiration.

Illustrated by Lynne Cherry.
OCTOBER \$7.95

Kilgallen with the gloves off.

She was the most famous woman reporter of her time; a Broadway columnist who could make or break reputations with a word; a radio and TV personality known to millions through *Dorothy and Dick* and *What's My Line?* But the private Dorothy Kilgallen was surprisingly different from the public persona. This first intimate biography explores her troubled marriage, her love affair with a leading pop singer, and the strange circumstances surrounding her sudden death—just when she had become deeply involved in an investigation of the JFK assassination. With photos.
