By letter dated March 31, 1975, to James B. Lesar, Esq., attorney for Weisberg, the Bureau released five pages of documents in the John F. Kennedy assassination investigation. These five pages related to the examination of a curbstone and are enclosed with this memorandum.

As can be noted on the first page of the Laboratory worksheet, lead smears from the curbstone were examined spectrographically. In a Memorandum of Points and Authorities filed in U. S. District Court for the District of Columbia, Weisberg has asked for "this spectrographic testing." An exhaustive search of pertinent files, and storage locations has not turned up the spectrographic plates nor the notes made therefrom. Therefore, by affidavit, Kilty can say that the FBI Laboratory has turned over to Weisberg all the material it has concerning the spectrographic examination of the lead smears from the curbstone.

ACTION: None. For information only.
