Dear Ray,

My friend Gary Mack who is research director or something like that for the Dallas Historical Society's Sixth Floor museum tell me that your friend is about to go for JFK assassination stuff that has no connection with Ruby and despite what he seems to believe, has no real value of any kind at all.

It has been years since I did any work on the photographs, still and movie, so I do not remember that woman's name. Pat something of other, I believe. One or more of the assassination theory nuts has been promoting her 8mm footage and I think she was to have been on one of the tabloid-journalism TV "news" shows last night.

The reason nobody has paid any attention to her footage is that it has no real meaning. I'm told she imagines seeing Oswald leaving the TSB in it but if that were true all those who have gone over it would have gone ape over it. Particularly Groden when he was the photo expert for the HSCA. He did steal a copy of it and he did use parts of it in the book he did.

Aside from the footage having no real value your friend will be laughed at for having any monetary interest in it at all.

If he doubts this I suggest he phone Gary. If he wants to he can say it is at my suggestion. That should remind Gary what he told me about it.

I am confident that film has nothing to do with either the assassination of Ruby. It is one of a number of amateur films taken at the scene but I doubt that any has less real value.

The FBI found nothing in it when it went over it.

Best,

Harold
