Nay Kurpis 4302 Farrell Lane Orlando, FL 32812

Dear Ray,

Dallas Historical Society's Sixth Floor museum tell ms that your friend is about to go for JFK assassination staff that has no connection with Rugy and despite what he seems to believe, has no real value of any kind at all.

It has been years since I did any work on the phitographs, still and movie, so I do not remember that woman's name. Pat something of other, I believe. One or more of the assassination theory nuts has been promoting her 8mm footage and I think she was to have been on one of the tablid-journalism TV "news" shows last night.

The reason nobody has apaid any attention to her footage is that it has no real meaning. I'm told hhe imagines seeing Oswald leaving the TSBD in it but if that were true all those who have gone over it would have gone ape over it. Particularly Groden when he was the photo expert for the HSCA. He did steal a copy of it and he did use parts of it in the hook he did.

Aside from the footage having no real value your friend will be alughed at for having any monetary interest in it at all.

If he doubts this I suggest he phone Gary. If he wants to he can say it is at my suggest gion, That should remind Gary what he told me about it.

I am confident that film has nothing to lo with either the assassination of Ruby. It is one of a number of amateur films taken at the scene but I doubt that any has less real value.

The FBI found nothing in it when it went over it.

Harolf
