

Dear Bill *Ray*

3/16/95

About a year ago I sent the enclosed more legible copy of Senator Russell Dissents along with another article, on Posner and his book, to The Washington Monthly. I sent a check for return postage if they were not interested. Then I heard nothing from them. So I wrote, several times before I got a known-nothing response, without what I had sent. Then this long thereafter I got it back. Just.

It is an extra copy now so maybe you'd like it.

The oranges are fine and we thank you for them. They do not appear to be eating oranges but they eat very, very well. While they do not section easily, they do section, and we do not make messes of ourselves in eating them.

As I remember it, they usually identify the variety on the label. They did not this so. But we do not enjoy them any the less for it.

They are large, ~~even~~^{uniform} in size and not too large. Beautiful to look at, too.

When you are in touch with Fonzi again you may want to mention NEVER AGAIN! to him and to tell him if he knows anyone in the Philadelphia media they should find what it has about Specter at the least interesting.

With the change in the weather the porch is no longer as cool as the refrigerator or cooler so we have the refrig filled with oranges and each evening before bed I retrieve two from the porch!

It may amuse you to know that by accident I have a digital watch that literally tells the time. In a woman's voice. Lil ordered something else and that was sent. I prefer a digital watch with large numbers for when I look at it at night w/o my glasses. None of the other features, only the time. This is a cheap one made in China. I've had them before and they keep good time. I've yet to try this on friends when I am with them but I think it may be fun. All I do is touch a button and the time in numbers comes out in this voice.

Our thanks and our best,

Harold

As so often happens I was able to add to this. When I have time, and I've had none for quite a few weeks, I've been enlarging this into a book, on the other part of his feeling, "I'm confident they've not told us all they know about Oswald."
