

7/30/80

Dear Jeff,

When Lil made the copies she stapled them all together. I'll leave them that way because how they belong is clear.

The teletype, 62-109060-167, is from the FBIHQ Kennedy assassination file.

Other of the Minuteman stuff I got is heavy on Rossen, complete with details of alleged personal life. If they had not penetrated those ~~with~~ ^{of who} whom he was associated they had a source ~~which~~ had.

I have some recollection of speaking to Larry Finley, then of the Chicago Daily News and later on the Sun-Times, about that part. I've not heard from him in years. He then lived, as I recall, at 13 Chestnut St.

They were relatively sophisticated and highly motivated. This is the apparent story behind a major anti-left intelligence operation they mounted, as I recall at Kansas State.

laid

The wife of one of the members, the name something like Glasser, ~~with~~ ^{laid} all the students she could and picked their minds. They wound up with one helluva list of names and addresses and other info, which they included in an issue of On Target. Probably several. Jim Lesar may have copies of them for a different reason: he knew some of those on the lists, I think as classmates at another time and place. I think there was a separate similar Illinois job but I don't recall how these names were gathered.

Hastily,
