Bear dia.

When I get have teday I listened to the tape to us from Jarry. He sys he made it 2/2. On the first half he was drank.

I am troubled by what is explicit and what I think has to be implicit. What I do not know is whether "erry is being truthful, lying, exaggerating or confabulating. However, I believe the safest course is to take what he says at face value.

He says Jiney sees his salvation in Sprague - not the countities - and that it is through getting back at them book writers.

In some perverse anti-establishmentarian way he sees the criticisms of Sprague as cretextials.

Of course all of this is irrational. But them so is Jissy writing Lowis and sending a Carbon, of All people, to O'Loary.

If Jorry had not been so very obviously drunk during the first half I night have some question. He is the same in content drunk or not (or less) drunk.

So I strongly argo you to take no chances and get on the record. By this I mean with vigor and pointedness to Genzales, not Sprague, with a carbon to O'Heill. End I do mean without a carbon to Sprague.

Jimmy is enough of a jailhouse lawyer to know that this committee cannot compel the testiment of writers about either their writingss or their sources. So what could have persuaded him to the contrary? Of the pensibilities the most obvious is what he could have been told by lame.

What makes this safe for you personally is the public statements by Hembers of the countities, particularly Burke, who has been queted an maying that Ray has asked to be heard by the countities. In and of itself this is a breach of the premise Sprague made to you in my presence in Hevenber if not in writing, as I'm not checking to noe. It is also greenly improper as long as you are Jimsy's lawyer. By order of the sixth circuit you are. This also puts some procesure on them, and I suggest you carbon them. So I suggest:

Dear Mr. Commales,

For some years I have been James Earl Ray's counsel. In recent months and longer than the existence of your constitue I alone have been ordered by the sixth circuit zourt of appeals to be his only and unpaid lawyer, even after I asked to be relieved of this responsibility.

I am without doubt that \_r. Ray's legal remedies have not been exhausted. I therefore have the responsibility to protect his legal rights and to pursue his intests as I see them.

From before the creation of your committee and to this memont you have not been in touch with me about him or his legal rights. Ifter my vigorous pretest ever the makinism clear and unhiddensiment of the committee's staff to trample on his rights I did have some conversations with members of the committee's staff, including Fr. Richard Sprague. Hr. Sprague assured me that on questions relating to Hr. Ray's rights I would be consulted.

New I find that "embers of your committee, including you, have concluded prior to any investigation that 'r. Ray is the assessin of Dr. "ing and that you intend calling him as a witness, the litter based on what so far as I knew is a deliberate miscenstruction of a letter he has written to another.

Mercever, this committee has lonked falsehood to the press, falsehood that also has my client as Dr. King's assessin. Your report and its appeal for funding of your committee and its continuation are based on those extremely productionly precessoration. You, personally, have been all ever the socia, inclining TV, saying he had help in his escape after the assessination. This is an explicit expression of precessoration and projudgement on your part.

While as a lawyer I as shocked at this open declaration of projudgment by what is supposed to be an importial investigation by the Congress, this is a matter for the Congress. In this, however, I am deeply distribed that a lawyer who without denial claims your choif seumeal exes his job to him has violated legal othics by masking in to seeing my client behind my back. I would hope that you and the Congress would be an deeply disturbed over his complexication of this, reported in the press as a six-figure deal and a nation picture which depicts him as a special kind of here.

This pass lawyer has bonston publicly of the indebtoiness to his of the chairman of your King association subconsittes, who has leaved himself to the presetion of a TV spectacular. Ar. Fauntrey's public statements are in accord with your our and your com-

mittee's report in declaring that my client is the assessin of Dr. King.

Under these conditions as Mr. Ray's lawyer I have no choice. "must ferbid any interviews of my client by or on hebalf of your consistee and may testimony by his.

You can, of course, ask the sixth circuit court of appeals to relieve as of this seligation and then perhaps proceed by some other means at to violate Mr. Ray's mights awas further.

However, as you should know, as lang as I as Br. Ray's langer I new have no alternative.

You, your fellow Mombers and your staff have prejudged and have gone public with

this projudgement.

I must tell you in all cander that after thousands of hours of work I have so reason to believe that Mr. May shot Dr Ming and abundant reason to believe he did not.

In prior discussions with your staff! I did not probable in. Ray's testimany before your consittee. I did insist on the preservation of his rights. The last of these discussions was in Nevember, almost three neuths ago. Since them you have all projected my client and have become particular in a matter that is still before the courts and in which all legal resedies have not been exhausted.

In my view you have in fact used this as buit to the courses and in particular

to the Combors of the black cassus.

Hr. May has never bone usualling to testify in his own defence. I did present his as a witness in an evidentiary hearing in fideral district court in Hemphis in 1974. He was then subject to corresponding and he then toutified that he did not kill Dr. King. You did not have to consult the newspapers, which reported this extensively. The actual transcript was provided to your consistes, with my assent, by empther active in Hr. Ray a defence. y reading of that transcript, however, does not purchase marking and the consistence could have known the neuros of either this or what to that point was all the real information your genuittee had. I think that the mombers may well have been led to believe that Mr. Ray a prosecution was the source. This would be entirely false, Ffeliure to disclose to the "enters the actual neuros is also, in my view, quite projudicial to Mr. May.

If as I have no reason to believe this was confusion on the part of the staff lawyer who addressed the committee there maxim is no reason to believe that your chief counsel

was under the same confusion.

Other effers of assistance to you that did not transgress on hr. Ray's rights were made to your consider last "cipher. To date these have not been accepted. Separately and in combination these lead no as a larger and as hr. Ray's larger to believe that fact and truth was not the quest of your staff, whether ar not the hombers were informed. And if they were not informed then there are very real questions about your staff, where it comes from any where it wants to go.

I would approciate your distributing copies of this letter to your "embers. Sincerely

Burke, Functively and he is particular in their public statements have previded a basis in addition to their looks and their report for you to look heras with those. To those issues and now you win, automatically. As I see the present situation you have little choice and you also serve your wem interest in keeping yourself above criticism.

"erpoyer, if the consittee is not continued then it will be less of a disaster if this

is all or part of the reason.

There will be other consittees, other eppertunities.

You might want to go farthurs from their looks, report and his personal claims to being on the "htresheld" and relating to "help" to immy, all in the context of Jimmy as assausin. I'd ask his about thier Portagess on-disaptrator in the sense of the charge of murier san, which requires only that Jimmy have known. I'd refer to the semantical primaring of the look and the report and ank straight out if their alleged source was one of Ray's jailtray on anyone connected with the jail. (Avery is not in the Hankville phenobook and the committee's available records do not disclose a trip to beauville, where one of Avery's name is listed. "I course this could have been by pheno, say from Hamphis. Say over by "eparted Omer.)

I do believe this is the mement, these enough of their errors. Be not also the mement, the opportunity.

and do not fail to let O'Moill and the Members know of Lanc's commocricalization of them. ....

Lardner also acked WWDG for a tape. When he called me today about Cutler's charge that he assassinated "arris he had not recieved the tape or may word about it.

Javel.
