Ar. Bud Fenstervald 1707 E St., BW, 10th floor Washington, D.C. 20006

Dear Bud,

Rightly or wrongly I gathered that if you do not have a sincere interest in the retiring Downing you feel a sense of obligation to him. This is one of the reasons I take time to write. Another is what I regard as your unwise decision to affiliate with Lane. This is to say your personal interest.

If I know what I'll report I'm sure reporters will know more and learn even more.

The committee to date has descaned self-respecting barrayards. I know of none of this shit that does not go back to your associate hane, i.e. the anchole. I do not mean by this that he apeaks for you or that this silliness was what you think or went.

His fellow goess are bonating that he is responsible for Sprague's getting his job ("acting," that is). And from the information offered we Sprague has told the committee what, if it gets around, could give Jimby more cause to blaze you if not sue you. I'm sure you have what you'd rather do than defend suits.

I'm bearing from too many people that have in running the committee not to wonder. Their record to date is typical mane and hirtful to them.

Lane - in May's context your associate - made false representations to limby. He also got Jim y to sign a release I've not seen (and would like to) for a duplication of my FUIA suit on the Aing materials. While I think this will not work and that Jimby has already had second thoughts I suggest seem to you in the event limby decides on simple arithmetic. Lane plus you.

On his initiative I've had two sectings with Sprague (the second withJim) and two phone conversations. I've written him several letters he probably dislikes more than his poker face or prosecutor's words reflected. From the information I have from a thoroughly dependable source whose sources include two Members Eprague behaved badly with in in not telling him what he told the Members. In effect that 'imay shot King.

In time this will get out. And to Jimny. Now to Jim, for I must tell him.

I don't know what the consistee has done, I've not asked and it has not been volunteered. But from that has been volunteered to so it has been on a course that means "impy killed "ing in its belief. I know more than this encapsulation, without having asked.

With the committee I've maked nothing. Of Rick I did, and for only the purposes I gave him preparing to defend against Downing's incentity in going for Hornow's fabrications. Other than for some possible archival value I have no interest. Rick was openly uptight and resentful so I have not repeated this. I have no real interest of other nature. And Rick has not given so what Downing used, ise., the public record. I do not sweat ever it. Nor do I really want to waste time reading it, for my own purposes anyway. It is dress. I'm/ sure you know, if you may not know those with interest in Hornow. Including foreign. Downing 's friend Morrow, that is.

What was told to the Hembers led one of them to tell a reporter friend of mine that they'll selve the King assassination. So they seat people to the Canadian border and to Chicago, which again sets back to Jissy, as I think you can see. Haybe Cliff, teo? (One member's sole objection was to the assumt of money spent by one person. I think I'd have questions about as I recall \$6,000.)

You'vem been caught up in all of this. I think you should watch out.

Sincerely.
