

DW, for your Lane collection

HW 5/28/78

Under "Newly Discovered Evidence" in the paperback he has only what I gave the DJ in 1969, what the FBI twisted to make it possible for them to write a self-serving internal memo saying that I was conspiring with Stoner to defame the FBI.

I don't know what kind of evidence it is but I do know that it is not new. However, as it was with the wheel, ,ane "discov red" it.

At 358 he says that Gracie Walden is the "most important witness to the murder of Dr. King. " (Naturally, not having seen the murder.)

We can call this "All in the Family," kore so now that Gracie is part of Eane's family.

The reason is that when he was cranking up onthe King stuff and puffing him- self up at the same time he said that Charlie was the best witness.

Now that he says that Gracie destroys Charlie, does she not have to be even better than the best?

He quotes one of the CIA records, pretending that he alone had gone after all of them and they were leaked on him alone. (Actually the AP reporter is one of the many who had gone for them, including me.)

Because he does quote the record you may want to remember the part he does not quote. About him, too.

The CIA put it well: most writers have an instinct for the jugular. Lane has an instinct for the capillaries.
