

Zorro - Lane promotions

EM 4/21/77

Yesterday I had a phone call from Lonnie Hudkins to accredit a reporter of the News-American who wanted to call me. If this seemed to be the purpose I think rather than Lonnie was reminded and wanted to talk to me. In any event the reporter, who he described as 25-26 and the son of another staffer, did phone later. I've forgotten his name and forgot to note it.

Lane was making appearances in Baltimore. During the course of explaining how important he is and how he brings to light suppressed evidence in the JFK assassination (he can hardly do ~~xxxx~~ this with King's, the supposed subject of Zorro) he told the press that he had obtained a copy of an FBI receipt for "a missile" taken from JFK's body.

I told the guy the truth, that I had obtained this years ago and had published it years ago. Forgot to tell him I'd put it in a court record.

Lane's story is that he got this under FOIA.

One can only wonder what else Mark has claimed as his own work.
