Zorro - Lane promotions

Yesterday I had a phone call from Longie Mudkins to accredit a reporter of the Mows-American who wanted to call ma. If this seemed to be the purpose I think rather that Lonnie was reginded and anted to talk to me. In any event the reporter, who he described as 25-26 and the son of another staffer, did phone later. I've forgotten him name and forgot to note it.

Lane was making appearances in Paltimore. During the course of explaining how important he is and how he brings to light suppressed evidence in the JFK assassination (he can hardly doxxith this ith King's, the supposed subject of Zorro) he told the press that he had obtained a copy of an FBI receipt for "a missle" taken from JRC's body.

I told the guy the truth, that I haw obtained this years ago and had published it years ago. Forgot to tell him I'd put it in a court record.

Lene's stoy is that he got this under FOIA.

ne can only wonder what else mark has claimed as his own work.
