

5/29/90

Dear Peter Lemkin,

Thanks for your letter and the order. The books herewith.

I have not had any trouble with the mail in years so I think you wasted the time and trouble and cost of sending it certified.

It was a convenience, though! It is raining quite hard today, we are 350 feet from the road, so the rural carrier had to hand-deliver it to get my signature.

First of all I would press a caution on you - find someone who is familiar with the fact, not all the theories, of the assassination and check your woman out.

Some of the nuttiest people are the most persuasive.

A number of woman have made stories up and some have gotten wide acceptance for what they made up.

You are not going to get much fact from Jim Marrs' book, for example.

I don't know how much you know about fact, but even if you were familiar with all the literature, it is not likely you are with the enormous amount of information that I've gotten through FOIA litigation.

If you want to ask me about what this woman has told you, I'll keep it confidential. But you should do some hard checking before getting into what you say you plan.

and you are going to have to authenticate what you tell people in seeking financing for your project. You'll get nowhere if you merely say I've got something hot and need some money, please.

I've never sought financial assistance but I have a notion that even if this woman is for real you'll have a hard time raising any real money.

I think also that you'll get no place with a publisher without solid support.

By which I mean that even if she is 100% truthful, her word alone will mean nothing.

You should begin by asking yourself two questions, first is this reasonable and next is it possible.

Most of the people who've been writing and speaking about the political assassination and intelligence agencies know little or nothing about them. They get their ideas from others who speak and write and really know nothing.

I don't want you to build up and then be disappointed after taking much time and building hopes up.

Do some checking first!!!!

Best wishes,

Peter Lemkin

Mr. Weisberg,

I am a researcher in covert operations and assassinations. I have long followed and read-up on the JFK assassination. Recently I had the unique luck to meet someone who apparently has direct knowledge of some very significant events of 11/22/63! I have reason to believe this person is for real. I am prevented from going into details here as since I have been meeting with this person very strange things have been happening on my telephone etc. (USA Thought Police, I presume busy at work suppressing the truth...as is their job.) This person is interested in telling their story, but she and I (we are thinking of doing a book together) need to research some details etc. and piece it all together. Might you know someone who would have sufficient interest and background to help finance such a one year venture and keep it to themselves until publication? Neither she nor I are looking to make money...just to get funds for the travel, research, calls, and perhaps hiding necessary for such a venture. Of course any potential backer would be introduced to the source and outline of our plans.

In any case, keep up the great work you have done and I hope you have recovered from your surgery.

Somehow, I'll get the information I have heard out. I think it could be one of the big, very big pieces of the puzzle we have all been looking for.

Thank you in advance. If you are ever in this part of the world (S. California) I'd be glad to speak to you in person regarding all this. Oh, yes Peter Dale Scott knows me well and Jim Marrs some.

On 11/22/63 the secret government stole our government from us...its time we take it back! I know you have long struggled to do so. Perhaps, now it is my turn.

Any tips on how to investigate with minimal problems from the 'thought police' etc. would be appreciated since things are already getting 'hot'. She was beaten up and her house ransacked and my phone only gets strange electronic noises when I talk to other JFK researchers. (They are so bold as to even want me to know they are listening!)

Warm regards and thanks!
