Dear Andy,

9/3/81

These are among the records I got yesterday, those that after a hasty reading seem to pertain to the supposed ongoing investigation after that of HSCA. I can see news values. If you have any interest or questions, please call. I'llbxx be going over them with more care soon.

If you use any of this, I'd prefer not to have it connected in public with the records because, to the best of my knowledge, I alone am getting them and I'd like not to have them cut off. I could have been denied these records, for example, because they were not generated until after my request and FOIA provides existing records only.

I think it is better to get the records, all of them.

Note that the new testing was arranged to be done in the private sector, where FOIA does not apply.

The claim is of impartiality. Yet the fierce partisan, Dr. Luis Alvarez, is on the panel and has already gone public in partisanship.

Obviously, the report is long overdue.

Best wishes,

129-12 Dept
