This book will still be shocking.

Not only because it tells, at last, the truth about the deception surrounding the killing of John F. Kennedy.

Also, because of what it tells about America.

This was a tragedy that did not begin in the diseased mind of a lone assassin. It involved a plot that may have reached into the highest levels of the United States government.

And it did not end on the crowd-lined streets of Dallas, near the Texas School Book Depository. It continued on, in a series of astounding events never before revealed, to Washington's Andrews Air Force Base and the Bethesda Naval Hospital.

This is the meaning of new evidence now uncovered by David

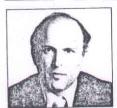

Lifton, after fifteen years of research — the most painstaking study ever conducted of the murder and the cover-up.

Mr. Lifton's evidence is so sensitive, so shocking, that Macmillan is compelled to forgo the pre-publication publicity usually accorded a major non-fiction title. No facts will be revealed until the day of the book's release.

Then, finally, America will have the evidence it has needed for seventeen years.

The Best Evidence.

DECEPTION AND DISGUIS
IN THE ASSASSINATION
