Dear Hal,

Good to talk to
you again.

The enclosure is from
James E. Casey's book, ^{paraphrase}
"House of the Virtues", "The
Coal Six Thousand."

I heard Dave Gibson
on the Art Bell Show. He
implies the Zapruder, the
Mushmaka, and Willis
films were actual.

His usual theories
probably explain why
his book is having
editorial problems.

Best wishes,

Ed Williams
