Dear Harold Weisberg;

About what time should your WHITEWASH III, be on sale, or can you say this yet, for reasons best kept to yourself? Aside from your books, Sylvia Meagher's item 1967, ACCESSORIES AFTER THE FACT, is the best all around general book, that I have read on the JFK subject. I hope that she may be able to carry on the investigation in another item of similar length?

MIDNIGHT, June 3, 1968, 15¢, Vol. 14-No. 46, has on pages 10 and 11 in a brief bit, by a Charles Anderson, a claimed Garrison interview or whatever (?), that Martin Luther King and JFK were bumped off by the same group of plotters? Now, isn't this something of a plant and? There is a rather odd top photo that I suppose if from Zapruder's film, has the background ~~deleted out~~, with a mere shadow on the extreme right edge of this shot? How come, once again?

CONFIDENTIAL for MAY, 1968, 35¢, has on pages 12, 13, 14, 15, 60, 61, another little bit stating that Garrison is merely nuts? Hog wash again. Author a Dirk Savage?

Now, Bobby Kennedy today? What is going on? Are we supposed to think these screwballs can do anything they want to?

In examining the 3 pseudo Oswald gun holding fakes, I notice that double printing and airbrushing has been done? Oswald, also, had on a large ring, November 22, 1963, that hung loose on his left hand. I notice that Oswald was wearing a v necked "T" white shirt on one photo and the rest he was wearing a round necked shirt? But, it does seem to be odd that no one author yet that I have read of, has ever nailed down these 3 photos as false and planted. Jean Stafford, did mention about Marguerite Oswald, that a few photos were taken off this place with the same camera after Lee was killed? I take it that Marguerite Oswald, assumed that these might be worth money to some publisher? It is criminal not to have a few other photos taken by the same camera lens to compare details within the one cover.

Inq. "v-necked?"

It seems that one of our Oswald doubles is right there is 2 of the false photos, and one was slight, has small feet, and is holding a different calibre rifle with a string on the barrel? This rather strange monkey business of a wire or string on the barrels of the 3 rifles should be made clearer and the implied right/left wing hint seems to be there plus that picket fence etc., await some new item on this affair.

Good luck on your continuing work.

Yours,
E. McCoubrey.
