Dear Gary,

Yes, I'll be getting a new ribbon this morning! I've used three in a month, I've been typing that much and the ~~ribbons~~ ribbons now are that poor, ^{hereabouts} ~~hereabouts~~, anyway.

More than a year ago I agreed for my books to be condensed in a single volume. I've just gotten proofs to read.

And I'm being reminded of such I'd forgotten, too! It is about one of these that I enclosed a proof of pages 154-5. On 155 Aleya got pictures of the rifle as found long, relatively speaking, before Studebaker and Day.

There is no way of knowing whether those were in the outtakes but if they exist I surely would like to be able to use the clearest in HOAX!

The rough draft of which, by the way, is done.

I no longer know anyone at WFAA-TV. I assumed that you do. Would you please ask the right person if they have this and if they do if I can get prints and use them?

If they still have them, as you might know from your own work, and if they agree, please get the way credit should be given so I can do that properly.

Either once again the truth can't come from Livingstone even by accident or his book is getting no attention. It is 10 days since he told someone I know that his book "is on the trucks," or being delivered.

I've not heard a word.

He then also volunteered what I'd assumed, that the outside libel lawyer advised C & G that some of what he wrote about me had to go. He complained about that to this friend he did not know is a friend.

Thanks and best to all.

Hardy

I heard that Lundberg made some juicy admissions in being ^(non-shar) deposed. If any of that is available I can still add it to NEVER AGAIN! Like Breo's credentials being those of a sports riter!
