Dear Jim Marrs,

As Gary may have told you, I was in touch with Evica over his notion that a paper on me as a government disinformation agent would be nice at the Rhode Island confab he and others held in the name of The Third Decade. I waited until a couple of weeks after that gathering to write him so he could not make any phony claim about trying to interfere with it. He did not respond. I wrote him again more pointedly and then he did reply, with what is either insane, has no credibility at all or both. But in the course of it he, without being as specific as he could, indicated that the idea originated with you and Jack White, both with no first names. He also had not responded to my asking him if in fact the idea was Harry Livingstone's. That would fit in with his coming attack on all of us as conspiring against him and helping those who killed JFK. I am anxious to collect all the information I can relating to both of these matters. From Gary I understand that in fact it was Evica who proposed the idea to you and Jack. I also understand that Harry left an outrageous message on your machine and that your children heard his profanity, etc.

As you probably know, some months ago Harry was rather violent in a number of letters. I collected copies of all I could and took a selection of them to the states attorney's office because they seem to be felonious under the Maryland Code. I have heard nothing since then. From what I was told I think it is not unreasonable to believe that no decision has been reached. That a writer is involved can well complicate the decision. If they do take a case against him, I have no desire to hurt him and I would ask that if convicted he be sentenced to the medical care he needs- and has in the past had. As he told me himself.

If you would care to give me a dub of that tape and any statement about it and anything else relating to Harry I would give that to the states attorney's office also, unless you did not want that.

That Evica et al had such crazy notions does not disturb me all that much but I would like to leave as full and accurate a record of it as I can.

I also want to be as well informed as possible on all aspects because with Harry's book clearly aimed at all others, including me from his letters, I want to be as fully informed as I can for its appearance. I think there are enough reporters who knew me well still around who might fall, as might some reviewers.

There was a Baltimore City police investigation into Harry's hiring of those cops. I do not know if it is over and dropped or still active. My hunch is that they'd like to do something that would not in itself be scandalous but I've had no contact with them and do not intend to initiate any....Thanks for anything you may send me. Sincerely, Harold Weisberg

Harold
