## Merry-Go-Round

Dean Acheson, the ex-Secretary of State, has a forgiving memory. He is about the only Democrat supporting Nixon in Nixon's criticism of the military critics. In the 1950s Richard Nixon, then Vice President, described Dean Acheson as presiding over "the college of cowardly Communist containment." . . . Sen. Stephen Young, the Ohio Democrat who says he's not going to retire at the age of 80, has a sharp memory. He is probably the youngest member of the Senate in point of vigor-and courage.
