Dr. Dennis MacDonald Richmond, The American University in Tondon Queens Road Richmond, Surrey TW10 6JP ENGLAND

Glad to hear from you and that you are enjoying England as you are. And I'm glad to get the clippings. I've needled Rosenfeld on the Wash. Post a bit more on the FBI lab with that story and about Mailer's continued mind-reading from the grave. I'd sent him an extra copy of a bit I'd written on the FBI Lab and

he seemed glad to have it.

Dear both,

What the Thatchers have done there and the Reagans have done here is being done elsewhere, no country having the capacity to learn. My friend in New Zealand has been reporting much the same from there.

We are about as we were except that the itch I'd had fof some years got much stronger after i left Johns hopkins. I supposed the medication they added reacted more with the medication to which I was reacting. Pretty consistent and disconcerting now and a major interference with sleep. Of which infow need and by and large am getting more.

I've written a long epilogue to Waketh that Neichter's paralegal id I think retyping. I'll know soon. Phoned him yesterday after not hearing from him for a while but they are above the floods and doing @K.

Gerry must be pretty busy. I have heard little from him lately.

Jerry has finished the revision to shorten his book on The Poor Peoples Campaign. It is a fine work. A publisher is having it read now.

If a "ondon paper like the Observer were to get interested in the record of the FBI Lab in the JFK and King cases it might feed back and get some attention here.

I'd not known that Mailer has been reading minds from the grave farthur back than the 1960s. But with the problems he had over the short range I can only wow wonder the disaster he's have after expns.

Especially with the radical right to go after him. But maybe Random House thinks that will sell books?

Thanks and best to you both,
