the State Department wants to give Panama everything—100 per cent. It's their position that our jurisdiction over the canal is an insult to their sense of nationalism. The treaty is one-sided. If we lost jurisdiction, there's no reason Panama can't nationalize the canal and assets of the Panama Canal. There's no reason to believe Panama will be satisfied with the new treaty, anymore than it was satisfied with revisions in the treaties made in 1936 and 1955."

FLU BUGS FLY BUGS. Long before the current flap over swine flu, Hugh McDonald, former FBI agent and author, in his book, "Appointment in Dallas," wrote the following: "If any reader of this book has suffered, in the last five or six years, from what he thought was London flu, or Hong Kong flu, and found his friends and colleagues sniffing in the same way, it is quite possible that they were in fact the guinea pigs of Vozrodenya, (a tiny island in the U.S.S.R.'s Aral Sea). The Russians transmit the germs in the jet stream, which passes from east to west. The operation is diabolically simple. Small missiles are introduced into the jet stream, carried by it to the U.S. Once there, these missiles are timed to release their nasty cargo over any given section of our country." Don't believe it? It's on pages 73-74.

LAXER TAXER? Apparently the IRS is trying to improve its image with the general taxpaying public because of public and private criticism that the IRS has used practices over the years that range from the abuse of power to excessive leniency. However, there has been no change in the IRS decision not to allow reporters to talk with the IRS agents known to be with Bill Smiley (Spotlight, Aug. 2, 1976) just before his death.
