JFK Assassination Records Appeals
Unaccounted withholdings
Worksheets

In Section 7 of the FBIHQ 62-109090 file the attached record bears no serial identification. My attention was drawn to it by the pieces of paper stapled to it, apparently to obliterate what ~~is~~ obliterated.

Efforts to determine what, if any, claims to exemption are made for these obliterations is impossible because it is impossible to identify the record in the worksheets. Without claim to exemption, all information is public information and may not be withheld as I understand it.

With some effort the same communication was located in the 62-109060 file where it is Serial 2601. There it does not have some of the notations made on the other copy and it does not have the pieces of paper stapled to it. However, it bears other information not included on the 62-109090 copy.

I cannot be certain but I believe there is also masking in the left margin of the 62-109090 copy. These also appear to be identical. (These are also remote-generation xeroxes.)
