Dear Bill,

A copy of a letter I've just written will more or less update you. Ed is coming out of an attack of diverticulitis very well but it has kept me from keeping up with things.

The typewriter came in fine shape. I was lucky that a friend had offered to drive us to the doctor because I figured I was too unsteady and too weak if she were to fall. ~~So~~ when it came he was able to handle the package that would have been too much for me. It is unpackaged and I've had time only to glance at the instruction book. What I'll have to learn is a bit intimidating! I've had no experience with any machines like this ~~one~~. The features are impressive but so is the learning that will be required. When I've time I'll read the booklet and I think make copies of the quick reference in the back and then tape those I'll be using most often on a card I'll keep nearby. It would be different if I were able to stop everything and practise but I cannot. So I think that what I'll do is use it for letters and when I write return to this. If I have to stop and find how to do things I'll not be able to concentrate on the writing. But I hope that with what is shorter and requires less concentration I'll be able to learn. The features are just fine. Besides which I'll not get my fingers inked up all the time.

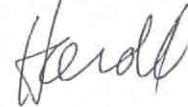

And I won't have to worry about pale ribbons of as I soon will with this if I can remove me not meant for this machine, which has lasted longer and given me less ink on my fingers.

This is really fine of you and we do appreciate it very much! Thanks also for the extra cassettes and the corrections. My will I use them!!!

I'll let you know when I get finished reading the instructions and start using it.

And today Ed seems better. She is at her desk!

Thanks and our best,

I sealed empty envelope in haste. So, I slit and taped it.
