

4/13/97

Dear Bill,

my thanks and the thanks of my friend and neighbor Charlie Baugher for not only the CB but the speed with which it got here- two days ago. He found it hard to believe and quite impressive that for a stranger you would get to such effort.

Charlie is retired, considerably younger than I and with the same heart by-passes that limit him ever so much less than mine. He does most anything, including I suspect what he should not. If I need anything within his capabilities all I need do is ask.

I've written Dave Wrono and asked him to lend you the Prouty and the Newman disks. You'd asked for the Prouty only but I'd just sent him both. At this point he called. He'll mail both to you tomorrow. ^{Whatever} the computer program that was used is, it is not his. I told him to ask you if you have someone there who can make a disk for him. If so let me know the cost.

Dave's daughter, who is a doctor, is doing research at the Stanford Univ. hospital. His son, who is a bit younger, just graduated from / the Stanford medical school.

Dave is a very fine person, So is his wife and are both children.

Thanks and best to you all,

Harold
