MARILYN DOROTHEA MURRET

News reporters Robert S. Allen and Paul Scott are authors of a syndicated newspaper column known as the "Allen-Scott Report." In their column March 26, 1964, in the "Northern Virginia Sun," they reported under the subtitle, "Hunt On For US Defectors." This column related the administration of President Johnson is launching one of the most intensive world-wide "man-hunts" in the past ten years ---- seeking to pinpoint the whereabouts of United States citizens who have defected to Russia or satellite countries since the end of World War II. The news column listed by name some of the "most wanted" defectors, and among those names was Marilyn Dorothea Murrett.

On interview April 23, 1964, Robert S. Allen advised a representative of this agency that the newspaper column referred to had been prepared by his associate, Paul Scott, and Allen referred all inquiry concerning it to Scott.

On interview April 28, 1964, Paul Scott advised a representative of this Bureau that his information concerning defectors had been obtained by him from two principal sources whom he declined to identify. He related that he did have some additional identifying information in his possession concerning Murrett; however, he could not furnish it until such time as he was able to "confirm" it through other means not disclosed.

With regard to Marilyn Dorothea Murrett, Scott stated he had some information to indicate a "tie-up" between her and the case of Lee Harvey Oswald, who assassinated the late President Kennedy, but Scott said his information was not confirmed; also he said he believed that Murrett was "linked" in some manner with the communist "apparatus" of Professor Harold Isaacs of Massachusetts Institute of Technology. Scott said he was unable at this time to furnish any additional information in this vein; he stated he was working on the matter of obtaining additional substantive data.

Inquiry at the Passport Office, Department of State, disclosed a passport file on one Marilyn Dorothea Murret, and information noted therein would appear to be pertinent to this investigation. The passport data is set forth as follows:
