Deer Mr. Adronson,

Although I for the moment went no public announcment of it, I have almost completed the draft of a New Orleans book for which I believe have made arrangements for major publisher handling. The manuscript was due yesterday and is at least a weak from completion. This book is one of the reasons my already nounced will TEWASH III: THE ARCHIVE, is lete. I have taken from it the pertinent Dallas and New Orleans material that I had been collecting pertinent to the story of the False Oswald, understanding of which Robert Allen does not reflect.

Garrison and anything that may flow from his investigations have a major problem in the desire of witnesses to live. - have this on type from a major one. Therefore, in addition to reason of vanity and journalism, I went to make my too-rished work as complete as possible.

A coreful reading of both my books should tell you that I from the first believed there was not-isolated "uban-exile involvement in the assassination and of osweld's involvement with them. In fact, I lost my agent over a November 1963 lead and summery saying Osweld was not personns non grate to the FBI. It is I (slone to the best of my knowledge) who present his New Orleans activity and phoney Fair Play For Juba Committee as an effort to establish an intelligence cover, his trip to Mexico as an effort to use it, and his failure ask the end of his utility. It is I who used the clear import of Mrs. Odio's testimony, not understood by those who were too heaty or did not put Oswald in place. Hence to a large degreem as the Washington Post, intending no kindness, said March 3, I wrote the Garrison script.

So I'm writing because of your very important story of 3/18, which says some of the things I have believed and could only hint at, the things I say elliptically. I understand that you may not be able to provide what I sack, the source of your story. I merely hope that in all or in part you can. If particular interest is Phyllis Rosner's Faese Sera stuff, what the paper said. Incidently, their Nov.8/65 issue had a Grent-paged picture of the motorcade showin, they say, both feerge demohranschildt and Ruby. I can lend it to you if you'd like. Perhaps your correspondent can get a print from the paper, if you are interested. To me the resemblance to part of dem's face is strong. Anything indicating a Show-CIA tie, of course, because I have felt since before any other book getisted that this makes sense of his use of Andrews.

The trade mert interests, not because of manchagtered interest interests, not because of manchagtered interests interests, not because of manchagtered interests interest interests interests interest interests interest i

have already written those parts of the coming book dealing with the training camps, especially the one raided near "ew Orleans 7/51/65, which I believe was an overt, parhaps the first evert, manifestation of the implementation of the policy that is part of the settlement of the Cube missle crisis (snother book I have already researched, say nothing about, and laid aside because I felt the situation required I work more with the immediate story of the assessination.

Another such manifestation is the arrest of Loren Eugene Hall, one of the characters in the story of The False Oswald, probably in October 1963, near Key Largom Florida, with a load including munitions. Customs did it, and he talked to them, earning the enmity of his colleagues. Anything you have or can supply on these events will help no end. Also, snything have do with exile raids on any evens hotels, especially the Rosita de Hornads, power stations and refineries, by air or sea, beginning the time of this raid or thereabouts.

I see particularly interested in the CIA connections katwarm of The Cuben evolutionary Council, the so-celled Cuben Democratic Revolutionary Front, JURE, the Student Revolutionary Directorate, and their personnel, including Sergio Arcschie Smith, both Arassto Rodriguezes, Carlos Bringuier, Carlos Bringuiery Cuiroge, Manuel Garmis Gonzelez, one Santans, reportedly missing on probation, Manuel Gil (of the so-celled information Council of the Americas and the guy who runs it, Butler, and whether they have CIA or USIA connections) and the other things rending my two books will indicate. If you haven t read the second, you may in this connection be interested in page 50 and chapter 7, which may immediate let you better understand my previous letters. To Betrage, to whom I am sending a carbon, I would add the Novedades story on the search for right-wing Cubens with whom Oswald had contacts in Mexico (and I do not read Spanish). May Isuggest to both of you the Eathers may be more involved the A is immediately apparent to even a suspicious person.

Add to the list Christian Temocratic Hovement, Rudolph Bichard Davis, the McLeneys, Leovino Interian, Henry Infente Ledes, Victor Paneque Batists, Heriberto Valdes Mollineds, one Fornes, and any Batista connections.

In shortm snything of the connections of the wide assortment of strange characters who have only one natural home in the US.

I have written you in confidence and hope you will so maintain it.

Probably in the near future I'll be in NYW to deliver this book. Would you care to lunch or dine with me then?

And thanks for anything either of you can provide. Do you want credit. I have neither fear norhesitation.

Also, any connections of Stanley Ross and his paper, including proof of his Trujillo agency. End a copy of the Castro 11/23 or 24/63 speech and that meeting of the interamerican Press Association, Sergio Carbo and any connections of either.

Sincerely,

Harold Weisberg
