

U
Dear Bill,

6/12/95

I've only about 10 more pages to finish reading and correcting what I've written about Newman's book. I should be able to do that yet this afternoon so instead I take time to assure you that the next time you want to bash a rental car I'm covered by a homeowner's policy. The ^{last} person to tangle with these pipes was 84 and should not have been driving at all. He was driving his pickup and managed to hang the bumper up on the end of one of the horizontal pipes. Had to hacksaw the pipe end off to free him.

The book's attitude is typical and it tells you when + never returned to the planned book The King Conspiracies.

I've been pleasantly surprised at the durability of Case Open. Tells you what they could have done without butchery and with promos. I'm still getting mail on it from people who've just bought it and all like it much.

But I'm still hearing of wide nonavailability of NA!

I fear I'm about to lose the retyping just begun of my Kailer book. So as of now I do not expect to get the Newman retyped, at least not soon.

Hope you both can make it in the fall. Gerry and Dennis will be here in August when they present a paper in DC.

I did not even see Oliver's book. If you can send me a xerox of the cover endorsement of it by Newman I'd like to use it!

I'm in the part where I really tee off on Newman, his end.

He is doing a book on Cuba that will be worse.

Best,
