Dear Bill.

7/15/95

Hasty response to yours of the 12th before nap.

I did send Wrone the Ruby psych. report when you could not find it but I'm glad you did for his citation of it.

Until there is a positive ID of the Rosenbergs I'm not convinced they were spies. Not that some Communists then were not. But they had no such secrets and what was kept secret at the trial as "national security" evidence turned out to be a cruel joke years later when it was disclosed.

We do indeed look forward to Gerry and Dennis coming next month. And they are two of the finest.

Agree on VN and how unapetizing those three GOPs are. And dirty.

I am still aming one of the tibbons you were kind enough to send me and it is not inking my fingers up. But it is not for this machine. Wrong spooks. Hope I have no trouble removing them. My recollction is that this is a 3000 but when someone is here who can hold it while I look at the bottom k'll se if there is any other ID on it.

I've finished reading Carlos Lechuga's In the Ete of the Storm, on his role in the Cuba Missile Crisis settlement and I regard it as an important book. I think I told you it is \$18 from The Last Hurrah, including shipping.

If thet subject interests you On the Brink is important in terms of the verbatim transcripts in it, not on its commentary, which is biased.

Best to you both,

There is no model number on the back, only the Hermes ID and the US distributor's name and address. Only a serial number inside...I hope our heat spell was broken by a severe electrical storm early yesterday a.m., 7/16. I went out about daylight for the paper and remained incide the rest of the day. Essentially what we have done, shopping in morning and staying inside after that. For Dick, I was not given any special warning about heat but I was about windchill and learned it was correct. In the windy City he should be careful about that. And learn what to do if he must be in it.
