Dear Harold:

Due to our putting the wrong stamp on your letter, I have to send it again and so I write this addendum.

Was in our large independent bookstore today. They still have a copy of Never Again and Selections. Out of Case Open. I asked them if they have Oswald and the CIA. They do not. I have yet to see Newman's book.

Minor disappointment today. My request for discretionary review of the KY Supreme Court was denied. We are right on the law, it is a right to advertise case for lawyers, but I think we are maligned as ambulance chasers and were denied. The Appeals court treated us as if we had a social disease. So I kind of know how you feel when you had FOIA cases.

Bought the new Sept. Vanity Fair, which has a hatchet job on Newt Gingrich. Apparently he has had sex with people he was not married to. Guess those old family values are good for those poor souls on food stamps, but not for Republicans. Thought it was funny that in the Susan Smith case, Newt said last fall that it was a result of the Democrats. Turns out that her stepfather, who started molesting her when she was 15, and continued to have a fling with her until she went to jail, is a big Republican and member of the Christian Coalition.

Vanity Fair also has an article on the Nixon movie, by your favorite, Oliver Stone. Apparently in the Movie, it is alleged that Nixon had something to do with the JFK murder. Some are calling the movie JFK Lite! I'll send the magazine to you later this week when I finish it.

Also an interesting article about Diane Sawyer and Michael Jackson. Jackson is a big music star and alleged child molester. ABC did a sweetheart job, soft interview passing for news, really Sawyer's worst effort. He had a bunch of anti Semitic lyrics on his album, but later said "his best friends were Jews". Really commercial anti Semitism at its worst.

Gotta go and do some work. Write soon.

Bill
