Dear Bial,

2/28/96

The clippings with your 2/23 are interesting. I had not known that Kissinger had made the promises of North VN. He double-crossed everybofy, he did. The People article on McMamama meeting with Giap is misleading. There was no first attack on our destroyers by their boats. on Buchanan, I wish someone would find the time g to go over his editorials from the defunct St. Louis Globe-Democrat. David Duke would have envied him.

Glad to know about that car heater. If as does not seem too likely I am here next winter I'll get one before the wold really sets in.

It must have been a scary time with your bother. But when he gets to where he has physical terapy then the improvement will speed up.

I've read DeLoach's book, thanks. A real apology for even boover.

I've forgotten what I sent you about Walt Brown. The complete ms. Dennis has and if the daughters of a friend you do not know who were volunteered by their father do not have too much rouble with the addition to Waketh I'll see if they'd like to tackle the treachery of Treachery, Or was it Betrayal?

I've finished with Groden uthil I get his new one, on order. And all is in boxes, all labelled. My munusuffs

The night cashier at the supermarket I'm at by 5 three mornings a week is in the local community college becoming a paralegal. She thinks she may know some student(a) who may be interested. The man who retyped what I did on Hosty is a self-activating disaster although a good guy. He refurned to me what I'd marked for correction without returning what corrections I'd indicated and appears to be out of town so I can't finish that up.

I think Whiteater may yet hurt the GOPs some. They have come up with nothing except immuendos. Waiting for the Lab to peph this morning a man who told me he has been a GOP all his life expressed his ga disgust with the candidates and the party itself and said he'll vote for Clinton.

Our ducks were back again today. And yesterday I saw the deer grazing on something near the end of the pool closer to the house. Buday th grass at the pond shows the return of color.

Depends on who did the candling what that date on eggs means. Some large lating farms do it and do it as soon as collected and cooled. If done commercially it is done at the wholesaler's. The candling is to detect blood spots. Ald, in the past, fertility. But eggs from flocks with roosters are not likely to reach the market.

lf the return of the mallards is a sure sign your spring six days earlier than ours.

Best to you all,

all, Lewiff
