Feb. 4, 1997

Dear Harold:

Well, it's raining, but I guess that is better than snowing. I have not written you in a few days, but thought I would drop you a line.

I sent Dave Wrone the disk of the LaFontaine's, because I had already printed it out. Have quickly read it. It is funny how some of the stories tend to run in a pattern. I think the main thing I have learned from you is to try not to cobble conspiracy theories together. But I guess that is easier than research.

I sent some of my most interesting material to my old college history prof, Bob Ireland. He has a law degree from Stanford, but became a historian. He is one of Kentucky's leading historians. He has given me some encouragement, once I kidded him about me sending him stuff, and he said keep it coming, he finds it interesting. So at least he has an open mind! One of the things I sent him is the FBI memo where LBJ asks them to look into the CIA and JFK. I think it is one of the most interesting things I have ever read.

I have had a few of what I call "freak out moments", times when I got material from you that shocks me. The Altgen's pic was one time, getting copies of Sen. Russell stating that the murder was a plot was- another, and the 4-4-67 FBI memo was another. These things are so amazing they just fascinate me!

I plan to come up sometime this year. I told Betsy she better come too. I may try to get Ginocchio to coordinate and join us. He is so good in your files, he showed me a lot. He really knows that stuff.

I enclose an article you may find interesting.

Otherwise, things are OK. Caterpillar is putting a small plant here in the state, Danville. The law business is fine, and the tractor biz is great. So, next week we go to Daytona. Betsy stays home. We'll just see how Larry gets around in a wheelchair and cane. Still think he should go to Mayo.

My para legal Janice may be interested in doing some typing for you. Why don't you send me a couple of pages of the stuff you have that needs to be retyped and I will show it to her.

Otherwise, take care and I 'll write soon.

Hoping the stock market keeps going up,

Bill
