Dear Harold:

I am sure you think I have neglected you, but I have not! Just got back from Daytona last week, could not even find a girly postcard to send you. Larry, sitting in the wheelchair section, was almost hit by a plexiglas window that came out of a car barrel rolling at 170 mph. Like I told him, at least you have something to talk about on your radio show! He did one 8-9 pm on WHAS, his yearly Friday night before the 500 show. One of the best racing shows in the country because we know the dirt, the gossip, and even the truth! Larry is now famous just from his 10 times a year racing show.

Thanks for all the material you have been sending me, including the new book on Newman. I am sure Newman was a disappointment to you, as he should know better. I have his book, but yet to read it.

Janice is typing away on that stuff you sent her a few days ago. Let us know again how much you are paying her.

Glad you like the oranges. Meant to send them to you earlier, but I was mad they never acknowledged my letter to them about the mixup in bills.

Big news on Betsy. Her medical records program at the Ky College of Business got accredited. A miracle. She is very happy. Now she runs her own medical records program, and works at the State Prison three days a week. Two jobs, one at a college and one with inmates.

I have been looking around for a low key place to make a speech on JFK and MLK. I guess I'll have to study Frame up a little more, since King's case has come to the fore. Maybe the Pewee Valley playhouse. Want to display some documents. I hope you realize, Harold, that none of this that is happening for James Earl Ray could have been possible except for your work. You should be very proud. Bill Pepper is a good lawyer, but an uncertain historian.

I enclose Ray stuff. Some interesting.

Hope you and Lil are doing well. I did see one thing interesting the other day. HIV patients who have adequate Vitamin B 12 go twice as long as those without B12 before they develop AIDS. Bet they sold out of B12 in Greenwich Village the day that article came out. Did not get the PR it deserved. I have always taken vitamins, and I think all will agree I have achieved the maximum growth!

Peace

Bill

Say "Hi" to A Knight!
